Baltimore, Maryland

Mechanicam vero duplicem Veteres constituerunt: Rationalem *quae per Demonstrationes accurate procedit, & Practicam. Ad practicam spectant Artes omnes Manuales, a quibus utique* Mechanica *nomen mutuata est. Cum autem Artifices parum accurate operari soleant, fit ut* Mechanica *omnis a* Geometria *ita distinguatur, ut quicquid accuratum sit ad* Geometriam *referatur, quicquid minus accuratum ad* Mechanicam. *Attamen errores non sunt Artis sed Artificum. Qui minus accurate operatur, imperfectior est Mechanicus, & si quis accuratissime operari posset, hic foret Mechanicus omnium perfectissimus.* NEWTON

La généralité que j'embrasse, au lieu d'éblouïr nos lumieres, nous découvrira plutôt les véritables loix de la Nature dans tout leur éclat, & on y trouvera des raisons encore plus fortes, d'en admirer la beauté & la simplicité. EULER

... ut proinde his paucis consideratis tota haec materia redacta sit ad puram Geometriam, quod in physicis & mechanicis unice desideratum. LEIBNIZ

The ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS nourishes the discipline of mechanics as a deductive, mathematical science in the classical tradition and promotes pure analysis, particularly in contexts of application. Its purpose is to give rapid and full publication to researches of exceptional moment, depth, and permanence.

Each memoir must meet a standard of rigor set by the best work in its field. Contributions must consist largely in original research; on occasion, an expository paper may be invited.

English, French, German, Italian, and Latin are the languages of the Archive. Authors are urged to write clearly and well, avoiding an excessively condensed or crabbed style.

Manuscripts intended for the Archive should be submitted to an appropriate member of the Editorial Board.

CONTENTS OF VOLUME 28

AGMON, S., Asymptotic Formulas with Remainder Estimates for Eigenvalues of Elliptic Operators 165

BAZLEY, N., & B. ZWAHLEN, Remarks on the Bifurcation of Solutions of a Nonlinear Eigenvalue Problem 51

BERKOWITZ, L., & H. POLLARD, Corrections to our paper "A Non-Classical Variational Problem Arising from an Optimal Filter Problem" in Vol. 26, pp. 281–304 (1967) 399

BREZIS, H., & M. SIBONY, Méthodes d'Approximation et d'Itération pour les Opérateurs Monotones 59

FIFE, P. C., Considerations Regarding the Mathematical Basis for Prandtl's Boundary Layer Theory 184

GURTIN, M. E., On the Thermodynamics of Materials with Memory 40

HAYES, M., On Pure Extension 155

LESLIE, F. M., Some Constitutive Equations for Liquid Crystals 265

MARRIS, A. W., & S. L. PASSMAN, Generalized Circulation-Preserving Flows 245

MARSDEN, J. E., Generalized Hamiltonian Mechanics. A Mathematical Exposition of Non-smooth Dynamical Systems and Classical Hamiltonian Mechanics 323

MARSDEN, J. E., Hamiltonian One Parameter Groups. A Mathematical Exposition of Infinite Dimensional Hamiltonian Systems with Applications in Classical and Quantum Mechanics 362

MÜLLER, I., A Thermodynamic Theory of Mixtures of Fluids 1

PASSMAN, S. L., see MARRIS, A. W. 245

POLLARD, H., see BERKOWITZ, L. 399

SATTINGER, D. H., Stability of Nonlinear Hyperbolic Equations 226

SCHMIDT, G., Spectral and Scattering Theory for Maxwell's Equations in an Exterior Domain 284

SERRIN, J., Addendum to "A Priori Estimates for Solutions of the Minimal Surface Equation" 149

SERRIN, J., On the Mathematical Basis for Prandtl's Boundary Layer Theory: an Example 217

SIBONY, M., see BREZIS, H. 59

TRUESDELL, C., Corrigenda et Addendum Alterum ad Schediasma meum de Motibus Praemagnis Corporum Elasticorum in Vol. 11, pp. 106–113, anno 1962, et in Vol. 12, pp. 427–428, anno 1963, huius Archivii . . . 397

WYNN, P., Upon the Definition of an Integral as the Limit of a Continued Fraction 83
